5. After IntelliJ has opened the project, click on the “RUN” button 
6. Open Google Chrome and enter “localhost:8080” into the search bar to get on the login page.

2. User Guide

The user guide is a quick explanation of how to use the web shop and it is separated into a user guide for administrators and one for the users.

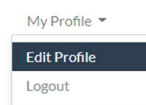

Please note: The aim of the web shop is not that end users can order directly, but that users create customers and then place the orders. The users are the employees of the company, and the customers are the end users of the purchase product. The users act as a kind of intermediary. Therefore, administrators can create products and users can create customers and place the orders.

2.1 User guide “Administrator”

1. To log in as system administrator, enter *localhost:8080* in the search bar of Google Chrome to get on the login page. Enter the following credentials and click on “Log In”
